About Us

CAGP

Established in 1997, CA Global partners is a global company providing equipment management and capital recovery solutions to leaders in technology, finance and industry.

Due to the relationships that have been formed in the aviation industry since our partnerships & auctions, we have produced an ongoing airport assets brochure which offers used equipment sourced from UK airports and beyond. Airport Assets is a CAGP owned and operated portal project dedicated to the sale of excess airport assets globally.

Covid 19

To all of our valued customers and clients, we hope you are well and safe. We are taking a number of further steps to address the continued challenges of the Covid pandemic. We know the extended global travel restrictions will be impacting your operations and future capital spend decisions beyond 2021.

How can we help?

Airport assets can supply, where possible, a cost effective used supply chain of security assets to enable your airport or organisation to continue through the uncertainty by providing either a suitable stop gap solution or an alternative to new asset purchases .

RAPISCAN/Morpho itemiser 4DX

ver C10.06.11-CEP explosive detection

**Last Two remaining!
Immediate delivery**

Library picture

Using a Non-Radioactive ionization source, Itemiser 4DX can detect threat explosives in passenger baggage security.
ECAC fully compliant
Operational and ready for immediate delivery - globally

Private treaty sale **£POA**

Operational history of units for sale
Manufactured 2017/18, operational 2018- mid 2019.
2x Units available with sample count 9.5k and 2.5K passengers.

Key Features

COST EFFECTIVE

Automated internal calibration eliminates cost of purchasing and managing calibration traps. Folding monitor screen automatically shuts off backlight to extend life of display. Regenerative dryer increases uptime and eliminates cost of monthly dryer material replacements. Decreases labour required to initiate and manage maintenance.

EASE OF USE

Non-radioactive ionization source removes shipping restrictions and licensing requirements. Built in printer for fast hard copy results or printing later. Quick analysis and results in approximately 8 seconds. On-board software keypad and help files. Automated, push-button maintenance can be scheduled. Easily accessible maintenance items. Ability to create custom substance libraries.

PORTABILITY

Lightweight (28.65 lb/12.99 kg) with built-in handle for easy transport. Internal, one-hour battery allows instrument relocation without shut off, eliminating warmup time.

Used

RAPISCAN- 620Dv dual view X-ray,

Operational dual view 620dv x-ray machines, used until recently in a major UK airport. The units are available in standard form or feature LEDs, all have the latest ECAC compliant algorithm (2020 onwards). The equipment has been fully serviced throughout their life. The opportunity enables a new buyer to obtain modern usable dual view technology at a large cost saving over new.

Private treaty sale **£POA**

Operational history of units for sale.

Various years of manufacture available, 2008, 2015, 2017/18.

low passenger bag counts available.

Units serviced regularly.

Full service history.

Continued software/algorithm updates.

Key Features

- + Transparent walls
- + Rigid construction
- + Configurable operating modes
- + Upgradeable detection software

Scanning Features

- + Automatic detection, no images presented or generated
- + Front and back generic mannequin presented side-by-side
- + Parallel screening options for increased throughput
- + Automatic system diagnostics capabilities

Operational history of unit

Manufactured 2016. used 2016-2018 and approximatley for 3 hours during 2019

Ultimate Privacy: Image-Free Technology

The ProVision 2 boasts similar privacy protocols as walk-through metal detectors since images are not generated. Numeric scan data is analyzed by software without human intervention to determine if any threats are present. Potential areas of concern are mapped onto a generic mannequin, which is identical for everyone, and presented to the operator. Security personnel can then assess the situation. If nothing is detected, a green screen with an "OK" appears and security personnel can clear the individual.

Health and Safety: Safe Radio Wave Technology

The ProVision 2's sensing mechanism is based on millimeter-wave technology using safe radio waves that pose no health and safety risks. These signals pass through most types of clothing, but do not penetrate the body. The reflected waves are captured by the system's sensors. The ProVision 2 does not use ionizing radiation, such as X-rays, and is tens of thousands of times less powerful than other commercial radio frequency devices like cell phones, wireless handsets and other standard household devices. The ProVision 2's millimeter wave technology has been extensively evaluated by regulators worldwide including the U.S. Food and Drug Administration, Health Canada and the Dutch Institute of Applied Science (TNO), and found to be safe.

EUROLOGIX

Introducing our service partner, RedteQ Analytical Ltd

RedteQ Analytical Ltd are a UK-based company that provide worldwide service support to many clients across the world.

We are an independent global service provider on security equipment sales, installation, servicing & repairs

The products we support are X-ray screening, Tray Return Systems, Explosives and Drug trace Detection equipment, Metal Detectors & Body Scanners..

Our quality of workmanship is of the highest class as expected for the equipment we maintain and support. We always put the customers first and adapt to their needs, we are unique in that we can be as flexible as we like to adjust anything for the customer's requirements.

RedteQ Installation, Servicing and Repairs include:

- + X-ray equipment
- + Tray Return Systems
- + Explosives/Narcotics detection equipment
- + Metal Detection

RedteQ Analytical Ltd
Alan Redpath

“ RedteQ have worked with CAGP for a number of years, successfully preparing, delivering, installing and training customers on their equipment purchased.

We believe CAGPs goal of sustainability and selling surplus equipment is the future for aviation security, why buy new when you can buy used equipment that performs the same task that the current new model provides. ”

Providing sustainability in the security sector

Airport Assets is committed to providing a sustainable procurement avenue for the airport industry and beyond.

HAVE YOU
ASSETS TO
SELL?

We believe that purchasing quality used assets will help your organisation achieve sustainable and commercial benefits including;

- + Value for money
- + Enhancement of your company's sustainability policy
- + Protection and enhancement of the environment
- + Creating a flexible and diverse future supply chain
- + Demonstrating budget responsibility for share holders

If you have security items to sell, asset rationalisation can help in your sustainable & environment footprint goals by providing the following benefits:

- + Generate revenue from redundant assets
- + Reduce recycling and extraction costs
- + Offset project decommissioning costs
- + Reduce volume of assets scrapped

Next steps to achieve your environmental and sustainable responsibilities

Contact Airport Assets if you have assets to buy or sell. Simple.
